DETAILED ACTION

This restriction is in response to the substantial amendments to the claims.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4,10-16, drawn to a computer implemented method and apparatus with logic programmed to facilitate a sale of a mortgage by determining a price for the mortgage using pricing logic associated with the purchaser prior to selling the mortgage loan., classified in class 705, subclass 35.
 - II. Claims 5-9,17-44, drawn to a computer implemented method and apparatus with logic programmed to facilitate the sale of a mortgage by applying a set of business rules to the set of loan data prior to selling the loan to the purchaser , classified in class 705, subclass 35.
2. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
3. Inventions I and II are directed to related as two related apparatus and two related methods. (The two product and method inventions are not the subject of this restriction, rather the groupings are between two distinct sets of product/method combinations.) The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious

variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the inventions have different modes of operations. The invention of group I is mutually exclusive of the invention of group II.

4. Newly submitted claim 45 is directed to a combination and is genus to either group I or Group II and will be examined with the elected invention.

5. A telephone call was made to counsel on 03022006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard C Weisberger whose telephone number is 571 272 6753. The examiner can normally be reached during the hours of maxiflex. attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vince Millin can be reached on 571 272 6747. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
